PASSION FOR ENGINEERING EXCELLENCE

TABLE OF CONTENTS & ROADMAP

Engineering the Arteries of Modern Sri Lanka

For over three decades, **RR Construction (Pvt) Ltd** has served as a foundational pillar in Sri Lanka's heavy civil engineering and infrastructure transformation. This profile presents our integrated capabilities, self-owned industrial manufacturing base, multidisciplinary engineering sectors, and our proven delivery track record.

DOCUMENT ARCHITECTURE & CONTENTS

Part I: Corporate Identity, Governance & Values P. 03 – 05

Who We Are, Key Data, Vision/Mission, MD's Address & Leadership Framework

Part II: Fleet Power & In-House Manufacturing P. 06 – 07

1,000+ Heavy Machinery Fleet, Asphalt Plants, Quarries, M-Sand & 6 RMC Plants

Part III: Core Engineering Capabilities & Sectors P. 08 – 13

Highways, Railways, Maritime Harbours, Bridges, Landslide Mitigation & Water Systems

Part IV: Megaprojects Showcase & Track Record P. 14 – 16

National Landmark Case Studies, Overseas Experience & 35+ Project Master Matrix

Part V: QHSE, Innovation, Logistics & Future Vision P. 17 – 20

Triple ISO IMS Systems, 2,000+ Workforce, AI & ERP, Regional Yards & Contacts

30-YEAR MILESTONES TIMELINE (1995 – 2026)

- **1995** **Inception & Central Bank Extension:** Partnered with ED Zublin AG on heavy structural works.
- **2003** **Port of Colombo:** Executed Queen Elizabeth Quay marine civil infrastructure.
- **2006** **Ampara Water Treatment Plant:** Large-scale industrial water purification & distribution.
- **2007** **Mahanama Bridge & Steel Structures:** Multi-span crossing over Nilwala River & 4 steel bridges.
- **2012** **Oluvil Port Coastal Protection:** Subsea breakwaters & harbour revetment works.
- **2016** **International Expansion:** Completed R. Vandhoo Harbour Seawall in Republic of Maldives.
- **2019** **Northern Railway Modernization:** Anuradhapura–Vavuniya track civil works with IRCON.
- **2024** **Central Expressway CEP-03 & Gandara Harbour:** Major national megaprojects execution.
- **2026** **30+ Years of Excellence:** Full vertical integration, CIDA CS2 leader, 2,000+ workforce.

WHO WE ARE

A Legacy of Engineering Excellence

Founded in **1995**, **RR Construction (Pvt) Ltd** is a premier 100% Sri Lankan-owned construction and heavy civil engineering enterprise, delivering integrated engineering solutions for major national infrastructure and specialized development projects across the island.

With more than three decades of industry leadership, we have established extensive multidisciplinary capabilities spanning **highways and expressways, railway civil works, bridge construction, maritime and harbour engineering, landslide mitigation, water supply & irrigation, piling, and aggregate production**.

Supported by a dedicated workforce of **2,000+ professionals**, a proprietary fleet of **1,000+ heavy construction machines**, and in-house asphalt, crusher, M-sand, and ready-mix concrete plants, our vertically integrated resource base provides total control over quality, supply chains, and project schedules.

CORPORATE KEY DATA FACT SHEET

Company Name	RR Construction (Pvt) Ltd	Year Established	1995 (30+ Years)
Legal Status	Private Limited Liability Company	Registration No.	PV 11346 | CIDA: C-10171
National Grading	CS2 (CIDA Highest Grade)	ISO Standards	ISO 9001, ISO 14001, ISO 45001
Direct Workforce	2,000+ Personnel	Machinery Fleet	1,000+ Heavy Units (100% Owned)
Head Office	Baseline Road, Colombo 09	Company Bankers	HNB, Seylan, Sampath, Cargills, Pan Asia

STRATEGIC GUIDING PRINCIPLES

Driven by Purpose, Guided by Integrity

OUR VISION

"Passion for Engineering Excellence"

To be the most trusted, capable, and technologically progressive heavy civil engineering contractor in Sri Lanka, delivering nation-building infrastructure with uncompromising quality and enduring resilience.

OUR MISSION

To deliver complex heavy civil infrastructure on time and within budget through vertical resource integration, proprietary machinery strength, skilled human talent, and strict compliance with global ISO standards.

THE SIX PILLARS OF OUR CORPORATE CULTURE

01. EXCELLENCE

Uncompromising technical rigor in structural calculation, raw material testing, and asphalt compaction tolerances.

02. INTEGRITY

Transparent contractual stewardship, ethical corporate governance, and authentic commitments to public safety.

03. INNOVATION

Continual fleet modernization, specialized Wirtgen cold-milling technology, and AI-assisted project management.

04. SAFETY FIRST

Zero Harm operational policy certified under ISO 45001:2018, daily toolbox talks, and mandatory PPE compliance.

05. SUSTAINABILITY

Manufactured Sand (M-Sand) replacing river dredging, RAP recycling, and bio-engineering for landslide slopes.

06. PARTNERSHIP

Decades of trusted collaboration with government bodies, ADB, World Bank, and local municipal communities.

National Construction Grading: CIDA Grade CS2 (Highest Tier in Heavy Civil Infrastructure) **CIDA REG: C-10171**

EXECUTIVE DIRECTION

Steered by Engineering Leadership

MANAGING DIRECTOR'S STATEMENT

Mr. Ranjith Senadhera S.D.

B.Sc. Engineering (Hons), M.Eng. (Industrial Engineering & Management)

"From our foundation in 1995, RR Construction was conceived on a singular tenet: uncompromising engineering independence. By investing in our own heavy equipment fleet, industrial asphalt batching facilities, aggregate crushing plants, and an exceptional technical team, we eliminate external dependencies and provide our clients with absolute certainty in timeline, structural integrity, and cost efficiency. Our dedication remains fixed on building enduring national infrastructure for generations of Sri Lankans."

Mr. Ajith Priyantha Galahitiyawa

General Manager - Contracts

B.Sc. Engineering, Chartered Engineer

Oversees commercial estimation, FIDIC contract governance, and project estimation with strict legal and financial precision across major tenders.

Mr. S.R. Gamage

General Manager - Operations

NDT, CEI Part 1 & 2 London, MIEDSL, MNFET

Directs operational deployment of the 2,000+ workforce and 1,000+ machinery fleet across maritime, highway, railway, and foundation sites island-wide.

CORPORATE GOVERNANCE & EXECUTIVE COMMITTEES

Technical Review Board: Multi-tier engineering scrutiny of structural calculations, geotechnics, and concrete mix designs.

Risk & Tender Committee: In-depth financial exposure audits, foreign exchange risk mitigation, and procurement planning.

IMS QHSE Steering Council: Direct monthly safety auditing, environmental compliance reports, and Zero Harm KPI monitoring.

TOTAL RESOURCE INDEPENDENCE

Unrivaled Fleet of 1,000+ Heavy Machines

At the core of RR Construction's execution supremacy is our proprietary, self-owned inventory of more than **1,000 heavy construction equipment units**. We do not rely on plant hire intermediaries, providing our engineering teams with instantaneous mobilization, customized attachments, and flawless scheduling across multiple concurrent megaprojects.

Central Heavy Machinery Depot & Engineering Fleet
Fully supported by our specialized Central Mechanical Workshop facility in Sapugaskanda

Earthmoving Fleet
300+ Active Units
Heavy hydraulic excavators (CAT, Komatsu, Volvo 20T–50T), wheel loaders, motor graders, bulldozers, backhoes.

Paving & Milling
70+ High-Tech Units
Wirtgen W200F cold-milling units, Vögele Super tracked asphalt pavers, Hamm tandem and pneumatic tire rollers.

Deep Piling & Drilling
25+ Rotary Rigs
Bauer and Casagrande hydraulic rotary piling rigs capable of boring up to 1500mm diameter sockets in hard bedrock.

Maritime & Dredging Craft
Amphibious Dredgers & Barges
Watermaster Classic amphibious cutter suction dredgers, marine support tugs, split-hopper barges, offshore pile hammers.

Heavy Haulage & Transport
250+ Heavy Transport Vehicles
Multi-axle low-bed transporters for plant mobilization, heavy tipper dump trucks, transit mixers, bulk cement tankers.

SELF-SUSTAINING MATERIALS BASE

In-House Industrial Manufacturing Network

RR Construction is one of the few civil engineering giants in Sri Lanka operating a complete, vertically integrated materials production infrastructure. We quarry our own aggregates, refine specialized Manufactured Sand (M-Sand), produce computerized asphalt concrete, and operate six strategic Ready-Mix Concrete plants island-wide.

Automated Asphalt Batching Plant

Yakawewa, Medawachchiya (120 TPH)

High-capacity computerized batching plant delivering hot-mix asphalt (HMA), wearing courses, binder courses, and polymer-modified asphalt to Northern and North Central highway corridors.

Quarry & Aggregate Crushing Plants

Thudugala, Omanthai & Veerapuram

Multi-stage cone and jaw crushers with daily output exceeding 3,000 metric tons. Supplies graded ABC road base, single-size aggregates, railway track ballast, and maritime armour rock.

SIX STRATEGIC READY-MIX CONCRETE (RMC) BATCHING HUBS

COMPUTERIZED BATCH CONTROL

Ampara Plant: High-grade structural concrete for Eastern Province infrastructure & water works.

Mirusuvil Plant (Jaffna): Dedicated supply for Northern Peninsula transportation & building works.

Iththapana Plant: Western & Southern expressway corridor and bridge foundations.

Vadduvakal Plant: Northern marine, bridge, and coastal stabilization projects.

Galgamuwa Plant: North Western heavy railway and highway civil construction.

Gandara Plant: Southern maritime breakwaters, harbour quays, and marine-grade concrete.

NATIONAL ROAD INFRASTRUCTURE

Pioneering High-Speed Expressways & Highways

Road and highway infrastructure is the lifeblood of economic mobility. RR Construction has delivered over **1,500 kilometers of national highways, multi-lane expressways, and rural connectivity networks** across all nine provinces of Sri Lanka.

Our capabilities cover the entire lifecycle: high-precision automated subgrade stabilization, dense aggregate base courses (ABC), multi-layer asphalt concrete paving with computerized slope and grade controls, and specialized concrete barrier slipforming.

KEY TECHNICAL HIGHLIGHTS

- Pioneered Sri Lanka's first high-output Wirtgen W200F cold-milling machine for rapid rehabilitation.
- Dual-lane Vögele Super tracked asphalt paving achieving exact Ride Quality Index (IRI) standards.
- Integrated roadside drainage, storm retaining culverts, and bio-engineered green verges.

Central Expressway Project (CEP-03) — Section P1
Client: Road Development Authority (RDA)
Multi-lane high-speed expressway segment featuring massive cut-and-fill operations, soft-ground stabilization, and multi-span viaduct approaches.

Integrated Road Investment Program (IRIP)
Client: RDA / Asian Development Bank (ADB)
500+ km of rural and agricultural road networks upgraded to asphalt concrete standards across Kalutara, Galle, and Ratnapura districts.

RAILWAY ENGINEERING & TRACK MODERNIZATION

Revitalizing Sri Lanka's Railway Network

Railway civil engineering demands unprecedented geometric precision, structural stability, and rigorous safety coordination under live rail traffic. RR Construction is a certified national leader in railway track renewal, substructure rebuilding, and civil ancillaries.

Our specialized railway division operates mechanized ballast profiling equipment, track lifting machinery, and flash-butt welding support systems, transforming century-old track alignments into smooth, high-speed 100 km/h passenger corridors.

Track Modernization Scope

- Excavation and formation stabilization of historical railway sub-grades.
- Supply and precision dumping of 100,000+ cubic meters of graded granite ballast.
- Installation of Pre-Stressed Concrete (PSC) sleepers and long-welded rail panels.
- Civil reconstruction of railway station platforms, level crossings, and drainage culverts.

Maho – Anuradhapura Track Modernization

Northern Railway Corridor (80 km)

Comprehensive track renewal including ballast packing, concrete sleeper replacements, and ancillary station structures executed in close partnership with IRCON International.

Kelani Valley Line Track Modernization

Western Province Commuter Line

Urban corridor rail rehabilitation, track embankment stabilization against river flooding, and structural bridge replacements under congested live operational conditions.

MARINE CIVIL ENGINEERING

Building Resilient Harbours & Coastal Defenses

As an island nation, Sri Lanka's economic prosperity is bound to the ocean. RR Construction possesses world-class marine civil engineering expertise, executing massive offshore breakwaters, fishery harbour basins, quay wall structures, and coastal revetments in unforgiving tidal conditions.

Equipped with proprietary amphibious dredging units (Watermaster Classic), heavy marine cranes, bottom-dump barges, and specialised GPS-guided rock placement systems, we deliver coastal defenses engineered to withstand catastrophic monsoonal wave energies.

MARINE ENGINEERING CAPABILITIES

- Quarrying, transport, and deep-water placement of 2T to 8T core and armour rocks.
- Amphibious cutter suction dredging of harbour basins and navigation approach channels.
- Reinforced marine concrete quay walls, boat repair slips, and landing wharves.

Wellamankara Fishery Harbour Development
Ministry of Fisheries & Aquatic Resources
Construction of primary offshore breakwaters, coastal revetments, basin dredging, and modern landing piers serving the southern fishing fleet.

Gandara Fishery Harbour Project
Ministry of Fisheries & Aquatic Resources
Offshore groyne structures, deep navigation channel deepening, heavy rock revetment placement, and onshore fish auction facilities.

STRUCTURAL CIVIL ENGINEERING

Connecting Communities with Iconic Bridges

Bridges represent the pinnacle of structural engineering where hydraulics, geotechnical bearing, materials science, and seismic dynamics converge. RR Construction has engineered dozens of critical river crossings, urban flyovers, and steel composite bridges.

Our expertise spans the entire structural spectrum: deep cast-in-situ bored pile substructures in flowing rivers, pre-cast pre-stressed concrete (PPC) I-girders and box beams, modular steel truss assemblies, and continuous composite deck slabs.

Engineering Disciplines

- Deep foundation socketing into bedrock under active river currents.
- Heavy crane girder launching and post-tensioning tendon stressing.
- Hydraulic scour protection revetments and gabion wing walls.
- Bridge deck waterproofing, expansion joint seals, and elastomeric bearings.

Matara Mahanama Bridge

Nilwala River Landmark Crossing

Landmark multi-span reinforced concrete bridge spanning the Nilwala River in Matara, constructed with deep bored pile piers and heavy pre-stressed girders.

Hirana Steel & Composite Bridges

Western Province River Crossings

Four heavy steel composite bridges engineered across complex waterways, featuring factory-fabricated structural steel trusses and in-situ reinforced decks.

SLOPE STABILIZATION & DISASTER PROTECTION

Taming the Hills: Landslide Mitigation

Sri Lanka's central mountainous regions face severe risks from monsoonal slope failures and landslides. In close partnership with the National Building Research Organisation (NBRO) and the Road Development Authority (RDA), RR Construction has pioneered geotechnical disaster protection across the island.

Working on near-vertical slopes often exceeding 60-degree inclines, our specialized geotechnical crews deploy crawler-mounted pneumatic anchor drills, high-pressure grout pumps, and shotcrete spray equipment to permanently stabilize critical transport lifelines.

GEOTECHNICAL SPECIALIZATIONS

- Soil Nailing & High-Tensile Steel Wire Mesh covering thousands of square meters.
- Pneumatic fiber-reinforced wet-mix shotcreting for rockface sealing.
- Sub-horizontal gravity relief drains (up to 40m depth) to bleed hydrostatic head.
- Reinforced concrete counterfort retaining walls & flexible rockfall dynamic barriers.

Landslide Disaster Protection Project (LDPP - Pkg 02)
Client: RDA / NBRO / JICA Funding
Major slope protection project securing vital highway corridors across Sabaragamuwa and Uva provinces using soil nails and horizontal drains.

Hatton – Nuwara Eliya Slope Stabilization
Client: Road Development Authority
Complex high-altitude slope anchoring and rockfall barrier installations executed along key economic tea-transport routes under relentless monsoonal rain.

WATER INFRASTRUCTURE & DEEP FOUNDATIONS

Sustaining Life & Building Solid Foundations

Reliable access to clean water and robust agricultural irrigation are critical engines of Sri Lanka's socio-economic development. RR Construction delivers large-scale water treatment plants, cross-country transmission pipelines, and major reservoir canals.

In parallel, our heavy piling engineering division provides foundational certainty for bridges, flyovers, and multi-storey structures. Operating hydraulic rotary rigs, we cast high-capacity bored concrete piles anchored securely into deep bedrocks.

Key Capabilities

- Industrial water treatment: Aerators, flocculators, clarifiers, rapid sand filters.
- Large-diameter DI, HDPE, and steel pipeline laying with electrofusion joints.
- Reservoir bunds, concrete spillways, radial sluice gates, and irrigation canals.
- Cast-in-situ bored piles from 600mm to 1500mm diameter with bentonite slurry support.

Ampara Water Treatment Plant

National Water Supply & Drainage Board

Construction of a comprehensive municipal water treatment plant, pump stations, and clear-water storage reservoirs providing potable water to over 100,000 residents.

Kalmadu Reservoir & Irrigation Scheme

Department of Irrigation

Rehabilitation of earthen reservoir embankments, concrete overflow spillways, and agricultural distribution canals restoring irrigation for extensive paddy acreages.

NATIONAL LANDMARK ACHIEVEMENTS

Megaprojects That Transformed Sri Lanka

Over 30 years, RR Construction has executed over 100 large-scale national infrastructure projects. The following portfolio represents a selection of landmark undertakings demonstrating our engineering capabilities.

Central Expressway (CEP-03)

EXPRESSWAY

Section P1 — Road Development Authority

Heavy civil works on multi-lane high-speed expressway, deep rock blasting, high-embankment earthworks, structural flyover approaches, and sub-base stabilization.

Maho–Anuradhapura Railway

RAILWAY

Northern Line Modernization — IRCON / SLR

80 km track renewal including 100,000 m³ granite ballast, prestressed concrete sleepers, bridge re-decking, and ancillary structures enabling 100 km/h train speeds.

Wellamankara Fishery Harbour

MARITIME

Ministry of Fisheries & Aquatic Resources

Construction of offshore primary and secondary breakwater arms, basin dredging, concrete landing quays, and vessel repair slipways.

Landslide Disaster Protection (LDPP)

GEOTECHNICAL

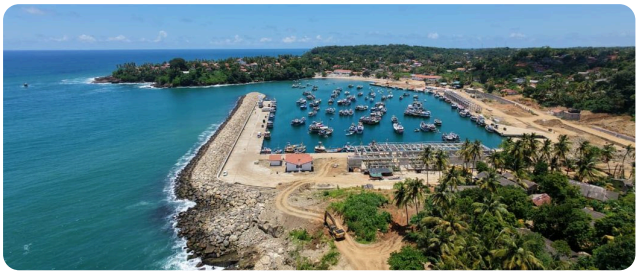

Package 02 — RDA / NBRO / JICA

High-altitude slope stabilization using thousands of soil nails, wire mesh, horizontal drains, and pneumatic shotcrete across vital hill routes.

ISLAND-WIDE & INTERNATIONAL DELIVERY

Proven Execution Across Sri Lanka & Overseas

Continuing our project showcase: major maritime developments on the southern coastline, comprehensive rural road transformations, iconic river bridges, and our international overseas infrastructure track record.

Gandara Fishery Harbour

MARITIME

Ministry of Fisheries & Aquatic Resources

Massive rock groyne construction, harbour entrance channel dredging, and reinforced marine concrete facilities designed for deep-sea multi-day fishing vessels.

IRIP Rural Road Connectivity

HIGHWAYS

RDA / Asian Development Bank (ADB)

Upgrading over 500 km of vital rural road networks to high-durability asphalt concrete standards with complete roadside drainage culverts and road safety structures.

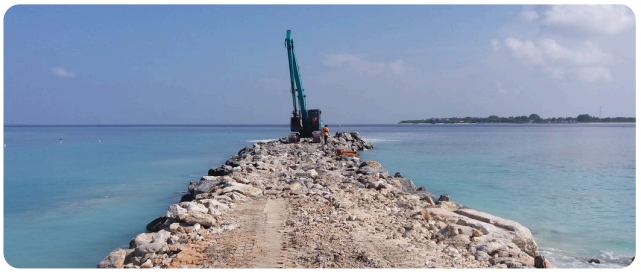

Matara Mahanama River Bridge

BRIDGES

Nilwala River Crossing — RDA

Heavy structural river crossing featuring deep bored cast-in-situ concrete piles, heavy pre-stressed girders, continuous deck slabs, and riverbank scour protection.

R. Vandhoo Harbour Seawall

OVERSEAS

Ministry of Environment, Republic of Maldives

Overseas marine coastal protection project: deep-sea armour rock seawall, geotextile sub-filters, and harbour entrance revetment executed in challenging coral atoll conditions.

PROVEN TRACK RECORD

Three Decades of Delivered Commitments

A representative cross-section of heavy infrastructure developments executed for government ministries, state statutory corporations, and international funding partners.

Project Name	Category	Client / Authority	Location	Status
Central Expressway Project (CEP-03) Section P1	EXPRESSWAYS	Road Development Authority (RDA)	Central Province	**Major Delivery**
Maho–Anuradhapura Track Modernization	RAILWAYS	IRCON / Sri Lanka Railways	North Central Province	**Completed**
Wellamankara Fishery Harbour Development	MARITIME	Ministry of Fisheries	Southern Province	**Completed**
Gandara Fishery Harbour Marine Infrastructure	MARITIME	Ministry of Fisheries	Matara District	**Completed**
Landslide Disaster Protection Project (LDPP - 02)	GEOTECHNICAL	RDA / NBRO / JICA	Sabaragamuwa / Uva	**Completed**

KEY INSTITUTIONAL CLIENTS & FUNDING PARTNERS

INTEGRATED MANAGEMENT SYSTEM (IMS)

Uncompromising Standards in Quality & Safety

At RR Construction, execution speed is never prioritized over human safety or structural perfection. Our corporate operations are governed by an Integrated Management System (IMS) triple-certified under international standards, ensuring accountability across every site.

ISO 9001:2015
Quality Management System

Mandatory site QA/QC laboratories, strict raw material batch testing, concrete cube compressive testing at 7/28 days, and calibrated nuclear density gauge compaction checks.

ISO 14001:2015
Environmental Management

Rigorous environmental impact mitigation, watercourse turbidity control, dust suppression misting, quarry rehabilitation programs, and acoustic barriers near residential zones.

ISO 45001:2018
Occupational Health & Safety

Comprehensive "Zero Harm" safety doctrine. Full PPE enforcement, certified rigging harnesses for high-altitude landslide works, emergency evacuation drills, and regular toolbox talks.

IN-HOUSE TESTING LABORATORIES & COMPLIANCE PROTOCOLS

Aggregate & Soil Mechanics: Los Angeles Abrasion, Aggregate Crushing Value (ACV), Flakiness Index, California Bearing Ratio (CBR), and Proctor compaction testing performed by qualified materials engineers.

Bitumen & Concrete Rheology: Marshall stability and flow, bitumen penetration testing, concrete slump tests, and ultrasonic non-destructive testing (NDT) on bridge piers and pile integrity.

"Safety is not an operational constraint at RR Construction; it is our foremost moral and professional responsibility to every employee and community member."

ZERO HARM CULTURE

OUR PEOPLE & DIGITAL INFRASTRUCTURE

Empowering Our People Through Technology & Innovation

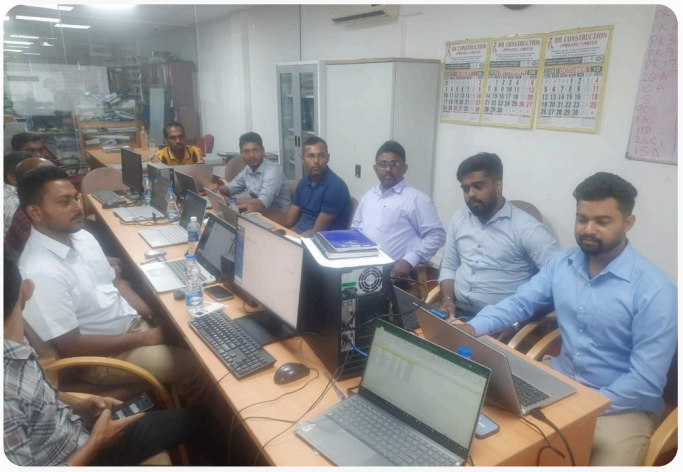

Behind every piece of heavy machinery and megastructure stands our greatest asset: our dedicated workforce of **over 2,000 highly trained personnel**. We foster a meritocratic environment combining seasoned civil engineers with dynamic young technical specialists.

WORKFORCE COMPOSITION

- 150+ Chartered & Graduate Engineers
- 250+ Surveyors & Technical Officers
- 600+ Certified Plant Operators
- 1,000+ Skilled Craftsmen & Field Force

Through our **Workforce Welfare Fund**, we provide comprehensive healthcare assistance, educational scholarships for children of site workers, and emergency housing relief, establishing deep loyalty and low staff turnover across all divisions.

Coursera AI & Engineering Upskilling Initiative
Continuous Professional Development
Strategic institutional collaboration training our civil engineers in advanced project scheduling, generative AI automation, and digital surveying methodologies.

Proprietary Cloud ERP Platform
Real-Time Operational Telemetry
Custom integrated platform tracking GPS telemetry across 1,000+ machines, automated fuel consumption audits, aggregate inventory, and digital QC sign-offs.

FUTURE OUTLOOK & OPERATIONAL PRESENCE

Strategic Vision 2035 & National Network

01. Smart Infrastructure & BIM

Expanding full Building Information Modeling (BIM) workflows and drone photogrammetry across all highway and bridge designs.

02. Green Construction Materials

Scaling low-carbon geopolymer concrete mixes, 100% recycled asphalt pavement (RAP), and solar-powered plant batching.

03. Regional & Overseas Scale

Building on successful Maldives marine projects to expand specialized dredging, harbour, and bridge contracting across South Asia.

ISLAND-WIDE OPERATIONAL HUBS & INDUSTRIAL FACILITIES

Head Office: No. 865, Dr. Danister de Silva Mw, Baseline Road, Colombo 09.

Central Workshop: No. 626C, Samurdhi Mw, Cheenagahawela, Sapugaskanda.

Main Warehouse: No. 150, Keragala Estate, Keragala, Henegama.

Heavy Machinery Yard: No. 504/L, Gorakagaswaththa, Biyagama.

Piling Logistics Depot: No. 301, Samurdhi Mw, Heiyanthuduwa.

Asphalt Batching Hub: Yakawewa Plant, Medawachchiya (NCP).

Aggregate Crushers: Thudugala (Kalutara), Omanthai & Veerapuram (Vavuniya).

RMC Batching Plants: Ampara, Jaffna, Iththapana, Vadduvakal, Galgamuwa, Gandara.

Overseas Base: Project Operational Offices, Republic of Maldives.

"With three decades of proven foundations, we stand ready to engineer the critical infrastructure of tomorrow's Sri Lanka."
