

HEALTH, SAFETY AND ENVIRONMENT (HSE) POLICY

R.R. CONSTRUCTION (PVT) LTD.

1.0 POLICY STATEMENT

R.R. Construction (Pvt) Ltd. is committed to achieving and maintaining high standards of Occupational Health, Safety and Environmental (HSE) performance in all its activities, operations, projects and services.

The Company recognizes that the protection of the health and safety of employees, workers, subcontractors, suppliers, clients, visitors, members of the public and other interested parties, together with the protection of the environment, is an integral part of responsible business management.

The Company is committed to preventing work-related injury and ill health, eliminating hazards where practicable, reducing occupational health and safety risks, preventing pollution, protecting the environment, fulfilling applicable legal and other requirements, and continually improving its HSE performance.

The Company considers HSE to be a shared responsibility, with clear accountability at every level of the organization. Management, employees, workers, subcontractors and suppliers shall actively contribute to achieving the Company's HSE objectives.

2.0 MANAGEMENT COMMITMENT

Top Management of R.R. Construction (Pvt) Ltd. shall demonstrate leadership and commitment to the implementation and continual improvement of the Company's HSE Management System.

Management shall:

- Establish, implement, maintain and continually improve the Company's HSE Management System.
- Provide adequate and appropriate resources, subject to approved budgets and management authorization, including competent personnel, equipment, facilities, training and other necessary resources, based on identified HSE risks, applicable legal and other requirements, and operational needs, to effectively implement and maintain the HSE Management System and achieve its HSE objectives.
- Establish HSE objectives and targets appropriate to the Company's activities, risks, opportunities and environmental impacts.
- Ensure that HSE requirements are integrated into business, operational and project processes.

- Ensure that hazards are identified and risks are assessed and controlled before and during work activities.
- Give priority to the elimination of hazards and, where elimination is not practicable, the reduction of OH&S risks through appropriate controls.
- Identify environmental aspects and impacts associated with the Company's activities and implement appropriate controls.
- Comply with applicable national laws, regulations, permits, contractual requirements, standards and other HSE obligations to which the Company subscribes.
- Provide appropriate information, instruction, training and supervision to ensure competence in HSE matters.
- Consult with and encourage the participation of workers and, where applicable, their representatives in HSE matters.
- Promote a culture in which employees can report hazards, unsafe conditions, near misses and incidents without fear of unfair treatment or retaliation.
- Provide appropriate Personal Protective Equipment (PPE) and ensure that it is properly selected, maintained and used.
- Establish and maintain emergency preparedness and response arrangements.
- Monitor, measure and evaluate HSE performance.
- Investigate incidents, nonconformities and environmental events and implement corrective and preventive actions.
- Conduct HSE inspections, audits and management reviews at appropriate intervals.
- Ensure that contractors, subcontractors and suppliers are appropriately controlled and informed of relevant HSE requirements.
- Continually improve the effectiveness and performance of the HSE Management System.

3.0 PREVENTION OF INJURY, ILL HEALTH AND ENVIRONMENTAL DAMAGE

The Company shall take all reasonably practicable measures to prevent:

- Work-related injuries and occupational ill health.
- Accidents, incidents and other HSE events.
- Unsafe acts and unsafe conditions through appropriate training, supervision, communication and control measures.
- Damage to property, equipment, machinery and facilities arising from foreseeable HSE risks.
- Environmental pollution and adverse environmental impacts associated with the Company's activities.
- Uncontrolled releases, spills or discharges of hazardous substances through appropriate storage, handling, containment and emergency response measures.
- Unnecessary waste generation and inefficient use of energy, water, materials and other resources.

The Company shall apply the principle of prevention before protection and shall seek to eliminate hazards at source wherever reasonably practicable.

Where hazards cannot be eliminated, appropriate controls shall be established in accordance with the applicable hierarchy of controls.

4.0 HAZARD IDENTIFICATION AND RISK MANAGEMENT

The Company shall establish processes for the identification of hazards, assessment of OH&S risks and determination of appropriate controls.

Risk assessments shall be carried out:

- Before commencing new activities or projects.
- Before introducing new equipment, machinery, materials or processes.
- When work methods or conditions change.
- Following incidents or significant near misses.
- When new hazards are identified.
- At appropriate periodic intervals.

Suitable controls shall be implemented and reviewed to ensure that risks remain at an acceptable level.

Where specialized activities such as marine works, commercial diving, underwater engineering or other activities requiring specialized competence are outsourced to contractors or subcontractors, the Company shall ensure, so far as reasonably practicable and in accordance with applicable contractual and legal requirements, that such contractors or subcontractors.

5.0 ENVIRONMENTAL PROTECTION

R.R. Construction (Pvt) Ltd. is committed to protecting the environment and improving its environmental performance.

The Company shall:

- Identify and evaluate significant environmental aspects and impacts arising from its activities.
- Prevent pollution and minimize adverse environmental impacts.
- Comply with applicable environmental laws & clients, regulations, permits and other compliance obligations.
- Minimize waste generation and promote reduction, reuse and recycling where practicable.
- Ensure proper collection, storage, transportation and disposal of waste.
- Control emissions, dust, noise, vibration and other environmental impacts.
- Prevent contamination of soil, surface water and groundwater.
- Use energy, water, fuel and other natural resources responsibly.

- Take appropriate measures to protect ecosystems and surrounding communities.
- Consider environmental impacts when planning new activities, projects, processes and changes.
- Establish environmental objectives and targets and monitor their achievement.
- Continually improve environmental performance.

6.0 COMPLIANCE WITH LEGAL AND OTHER REQUIREMENTS

The Company shall identify, access, maintain and comply with applicable:

- Occupational health and safety legislation.
- Environmental legislation.
- Labour and employment requirements relevant to HSE.
- Construction and project-specific requirements.
- Permit and licence conditions.
- Client and contractual HSE requirements.
- Applicable codes of practice and recognized standards related to HSE.

Compliance shall be periodically evaluated and appropriate action shall be taken where deficiencies are identified.

7.0 WORKER CONSULTATION AND PARTICIPATION

R.R. Construction (Pvt) Ltd. recognizes that effective worker participation is essential for achieving good HSE performance.

The Company shall provide appropriate opportunities for workers to participate in HSE matters, including:

- Hazard identification and risk assessments.
- Development and review of safe working procedures.
- Toolbox meetings and safety briefings.
- HSE inspections.
- Incident and near-miss investigations.
- Emergency preparedness and drills.
- HSE improvement initiatives.
- Identification of unsafe conditions and environmental concerns.

Workers shall be encouraged to raise HSE concerns and shall not be discouraged from reporting hazards or stopping work where an immediate and serious danger exists.

The Company shall provide reasonable time, information and resources necessary for effective worker participation.

8.0 COMPETENCE, TRAINING AND AWARENESS

The Company shall ensure that persons performing work under its control are competent on the basis of appropriate education, training, qualifications, skills and experience.

HSE training shall include, as applicable:

- New employee HSE induction.
- Toolbox talks and safety briefings.
- Job-specific safety training.
- Hazard identification and risk assessment.
- PPE selection and correct use.
- Fire prevention and fire-fighting.
- Emergency response.
- First aid.
- Working at heights.
- Excavation and confined-space safety.
- Machinery and equipment safety.
- Electrical safety.
- Manual handling and lifting operations.
- Chemical and hazardous substance safety.
- Environmental awareness.

9.0 COMMUNICATION AND INFORMATION

The Company shall establish effective internal and external HSE communication processes.

HSE information shall be communicated through appropriate methods, including:

- HSE notices.
- Toolbox meetings.
- Safety briefings.
- Training programmes.
- Meetings and consultations.
- HSE reports.
- Emergency communications.
- Written procedures and instructions.

Relevant HSE information shall be communicated to employees, workers, contractors, subcontractors, suppliers, clients, visitors and other interested parties as appropriate.

10.0 ROLES, RESPONSIBILITIES AND AUTHORITIES

HSE responsibilities shall exist at all levels of the organization.

10.1 Managing Director

The Managing Director shall provide overall leadership, direction and commitment to the Company's HSE policy and management system and shall ensure that adequate resources are provided.

10.2 General Managers

General Managers shall ensure effective implementation of the HSE Policy and HSE Management System within their respective areas of responsibility.

10.3 Project Managers

The Project Manager shall have overall responsibility for HSE performance at the respective project/site level.

The Project Manager shall:

- Implement the Company's HSE Policy and project-specific HSE requirements.
- Ensure appropriate risk assessments and safe systems of work.
- Ensure adequate HSE resources.
- Ensure proper supervision.
- Coordinate HSE activities with Site Engineers and HSE personnel.
- Ensure incidents and near misses are reported and investigated.
- Ensure corrective actions are implemented.
- Stop work where serious and unacceptable HSE risks exist.

10.4 Site Engineers

Site Engineers shall ensure that activities under their supervision are carried out safely and in accordance with approved drawings, method statements, risk assessments and HSE requirements.

They shall:

- Identify hazards and implement controls.
- Ensure safe working methods are followed.
- Conduct or participate in toolbox meetings.
- Ensure appropriate PPE is used.
- Report incidents, hazards and near misses.
- Stop unsafe work where necessary.
- Coordinate with the Project Manager and HSE personnel.

10.5 Other Technical Staff

Assistant Engineers, Technical Officers, Supervisors, Foremen and other technical personnel shall:

- Follow approved safe working procedures.
- Provide appropriate instructions and supervision.
- Ensure workers use required PPE.
- Identify and report hazards.
- Participate in HSE meetings and inspections.
- Ensure tools, machinery and equipment are used safely.
- Immediately report incidents and dangerous conditions.

10.6 HSE/Safety Personnel

HSE/Safety Officers shall provide professional advice and assistance to management and site personnel and shall:

- Conduct HSE inspections.
- Monitor compliance.
- Assist with risk assessments.
- Conduct safety awareness programmes.
- Monitor PPE compliance.
- Assist in incident investigations.
- Maintain HSE records and reports.
- Recommend corrective actions.
- Provide HSE advice to management.

10.7 Employees and Workers

Every employee and worker shall have a personal responsibility for HSE.

They shall:

- Comply with HSE requirements.
- Follow safe working procedures.
- Use PPE correctly.
- Report hazards, unsafe acts, unsafe conditions, incidents and near misses.
- Participate in HSE training and meetings.
- Protect the environment.
- Take reasonable care of themselves and others.
- Stop and report work where there is an immediate and serious danger.

11.0 CONTRACTORS, SUBCONTRACTORS AND SUPPLIERS

The Company shall establish appropriate processes for managing HSE risks associated with contractors, subcontractors and suppliers.

Relevant parties shall:

- Be informed of applicable HSE requirements.
- Demonstrate appropriate competence where required.
- Comply with applicable laws and Company requirements.
- Conduct appropriate risk assessments.
- Provide competent personnel and suitable equipment.
- Report incidents and HSE concerns.
- Participate in relevant HSE programmes and inspections.

Contractor and subcontractor HSE performance shall be monitored where appropriate.

12.0 OPERATIONAL CONTROL

The Company shall establish and implement appropriate operational controls for activities presenting significant HSE risks.

Such controls may include:

- Safe Work Procedures.
- Method Statements.
- Job Safety Analysis.
- Risk Assessments.
- Permit-to-Work systems.
- Inspection and maintenance programmes.
- PPE requirements.
- Competency and authorization requirements.
- Traffic and vehicle management.
- Lifting plans.
- Emergency procedures.
- Environmental control plans.

13.0 EMERGENCY PREPAREDNESS AND RESPONSE

The Company shall identify foreseeable emergency situations and establish appropriate emergency preparedness and response procedures.

These may include:

- Fire and explosion.
- Serious injury or medical emergency.

- Natural disasters.
- Chemical and fuel spills.
- Environmental emergencies.
- Equipment or machinery failure.
- Electrical emergencies.
- Working-at-height emergencies.
- Confined-space emergencies.
- Other project-specific emergencies.

Emergency arrangements shall be communicated, tested and periodically reviewed.

14.0 INCIDENT, NONCONFORMITY AND CORRECTIVE ACTION

All accidents, incidents, near misses, environmental incidents and significant unsafe conditions shall be reported and investigated in accordance with Company procedures.

The Company shall:

- Identify the immediate and underlying causes.
- Determine appropriate corrective actions.
- Implement actions within agreed timeframes.
- Verify the effectiveness of corrective actions.
- Identify opportunities to prevent recurrence.
- Maintain appropriate documented information.

Lessons learned shall be communicated to relevant personnel.

15.0 INTERNAL HSE AUDITS

The Company shall conduct internal HSE audits at planned intervals to determine whether the HSE Management System:

- Conforms to established Company requirements.
- Is effectively implemented and maintained.
- Meets applicable legal, contractual and other requirements.
- Achieves intended HSE outcomes.

16.0 MANAGEMENT REVIEW

Top Management shall periodically review the Company's HSE Management System to ensure its continuing:

- Suitability.
- Adequacy.
- Effectiveness.

- Alignment with the Company's strategic direction.

Management review shall consider, as appropriate:

- HSE objectives and performance.
- Audit results.
- Incident and near-miss trends.
- Compliance status.
- Corrective actions.
- Worker consultation and participation.
- Changes in legal and other requirements.
- Changes in risks and opportunities.
- Environmental performance.
- Resource requirements.
- Opportunities for improvement.

17.0 DOCUMENTED INFORMATION

The Company shall maintain appropriate documented information necessary to support the effective operation of the HSE Management System.

Relevant records may include:

- HSE Policy.
- HSE objectives and plans.
- Method statements.
- Safe work procedures.
- Incident and investigation reports.
- Environmental records.

18.0 CONTINUAL IMPROVEMENT

R.R. Construction (Pvt) Ltd. is committed to continually improving the suitability, adequacy and effectiveness of its HSE Management System and its HSE performance.

Continual improvement shall be achieved through:

- Leadership and management commitment.
- Worker consultation and participation.
- Hazard elimination and risk reduction.
- Environmental improvement.
- HSE objectives and targets.
- Training and competency development.

- Monitoring and measurement.
- Incident and near-miss investigations.
- Audits and inspections.
- Corrective actions.
- Management reviews.
- Lessons learned and implementation of best practices.

19.0 POLICY COMMUNICATION AND REVIEW

This Policy shall be:

- Communicated to all employees and workers.
- Displayed or made readily accessible at workplaces and project sites.
- Communicated to relevant contractors, subcontractors and suppliers.
- Made available to relevant interested parties where appropriate.
- Reviewed periodically and whenever significant changes occur to the Company's activities, operations, legal requirements or HSE risks.

All personnel are required to understand and comply with this Policy.

HSE IS EVERYONE'S RESPONSIBILITY.
